Est. Dec. 2014

Safety for the Rural Aging Road User

Presented by:

Pam Beer, Cambridge Systematics & Safety
Center

Gail Holley, Florida DOT

Bruce Hamilton, Roadway Safety Foundation

Webinar Logistics

- Duration is 11:00 AM - 12:30 PM Mountain
- Webinar – recorded and archived on website. For quality of recording, phone will be muted during presentation
- If listening on the phone, please mute your computer
- To maximize the presentation on your screen click the 4 arrows in the top right of the presentation
- At the end of each section, there will be time for Q&A
- There is a handout pod at the bottom of the screen
- Send group lists to info@ruralsafetycenter.org
- Please complete follow-up surveys; they are vital to assessing the webinar quality

Certificates of Completion/CEUs

- Survey Link –

<http://survey.constantcontact.com/survey/a07efsi0712jnk1xzvt/start>

- Survey closes 2 weeks after webinar
- Expect certificate/CEU form 3-4 weeks after webinar
- Return CEU form to ContinuingEd@montana.edu **NOT** Safety Center
- Request a verification of completion form

Certificates of Completion/CEUs

Course Registration Form

Roadway Safety
Foundation

Goals of this Webinar

Once you have completed this webinar, you will:

- understand the safety needs, challenges, and countermeasures for the rural aging road user. The webinar will begin with an overview, continue with a case study from Florida DOT, and finish with an explanation of the ChORUS website (a resource for planning and designing for the aging road user).

Learning Outcomes

To achieve the webinar goal, you will learn to:

Understand the nature and extent of the aging road user population

Summarize Florida DOT's aging road user program approach and implementation strategies

Restate the resources available in the clearinghouse for older road user safety (ChORUS)

Understand the nature and extent of the aging road user population

Summarize Florida DOT's aging road user program approach and implementation strategies

Restate the resources available in the clearinghouse for older road user safety (ChORUS)

The Facts

- In 2015 47.8 million people (15%) of the population were 65 and older
- By 2060 this population is projected to reach 23.5%
- In the next 4 years people 65+ will outnumbered children under 5 for the first time in history

National Population Projections

For the First Time in U.S. History Older Adults Are Projected to Outnumber Children by 2035

Note: 2016 data are estimates not projections.

The Facts

- Aging road users are safe drivers
 - Wear safety belts
 - Observe speed limits
 - Do not drink and drive
- Self-select driving times when risk is lower
 - Non-rush hour
 - Daylight driving
 - Familiar areas and routes
- More likely to be injured or killed
 - Fragile bones
 - Medical conditions (heart disease)
 - Diabetes
- Except for teens, highest crash rate per mile driven though drive fewer miles

Impact of Aging on Driving

Vision

- Eyesight changes
- Harder to see people, things, movement
- Takes longer to read signs
- Difficulty recognizing familiar places
- Glare from headlights/street lights
- Eye diseases (glaucoma, cataracts etc.)
- Require more light to distinguish roadway features

Impact of Aging on Driving

Cognitive

- Distraction or disorientation during driving
- Slower response to signs, signals, markings
- Maintaining control for long distances
- Difficulty judging time and distance of approaching vehicles (left turn)
- Delayed reaction to other vehicles, pedestrians, bicyclists
- Improper use of controls
- Becoming lost and confused

Impact of Aging on Driving

Physical

- Difficulty in turning head, looking back, turning steering wheel, braking
- Arthritis
- Trouble noticing horns, sirens or other noises
- Difficulty in hearing a warning

Issues for Rural Areas

- Access to alternative transportation
- Condition of roads (two lane, no shoulder, gravel)
- Signage (too small)
- Lack of lighting
- Rapid development (unfamiliar areas)

Potential Solutions

- Infrastructure Improvements
 - Lane width
 - Reflective markings
 - Larger lettering
 - Better lighting
 - Advanced notification
 - Roundabouts, yellow arrows at intersections
- CarFit
- Alternative transportation
- Licensing
- Assessments
- Training

Directing Your Questions via the Chat Pod

Florida's Aging Road User Program

- How we got started
- Our program today
- What makes program unique
- Tips to develop a similar program

How We Got Started

Roadway Improvements to Compensate for Natural Changes

Population Created a Catalyst for Change

The Early Years (2004 to 2009)

- Position and program established
- Shifted from Elder Road User Program to Aging Road User Program
- Established website: SafeandMobileSeniors.org
- Built partnerships with Departments of Elder Affairs and Highway Safety and Motor Vehicles

Our Program Today

Established Partnership

State Traffic
Engineering and
Operations Office

Pepper Institute on Aging
and Public Policy at
Florida State University

Safe Mobility for Life Coalition

“Working together to improve the safety, access, and mobility of Florida’s aging road users”

Define an Aging Road User

- Someone who is a ***driver, passenger, pedestrian, bicyclist, transit-rider, motorcyclist, or operator of a non-motorized vehicle*** who is **50** years of age or older, with a special focus on the **65** year and older age group

Align and Develop Strategic Plan

Goal

To improve aging road user safety and mobility in Florida by achieving a reduction in the number of aging road user fatalities, serious injuries, and crashes while maintaining their safe mobility and connection to the community.

Strategic and Collaborative Approach

Strategic and Collaborative Approach

What Makes Program Unique

Our Approach

- Positive approach and message
- Active and engaged coalition
- Comprehensive website and print materials
- Resources for all stakeholders
- Addresses needs of urban and rural areas
- Using data and evaluation for programs and materials

Positive Message

Keys to Achieve Safe Mobility for Life

Understand

Be Proactive

Plan

Active and Engaged Coalition

- Consistent communications and place to share information
 - Project Management Tool: Basecamp
- Establish roles and responsibilities
 - Coalition Member Handbook
- Empower team members and leaders
 - Breakout sessions and support

Florida's Guide for Aging Drivers

- The impact aging has on safe driving skills
- Keeping safe while driving
- Importance of planning for life after driving
- Access to local resources

Lifelong Community Transportation Checklist

- Helps identify features or services that are important to have in a community to help remain independent, mobile and active.
- Answers will help gauge whether your community meets your safety and mobility needs to successfully age in place.

Find a Ride Florida

Low Vision Users

Standard Black/White White/Black Yellow/Blue

Fill out the information below to find your transportation options in Florida

If you are a family member or caregiver, please complete the form on the rider's behalf.

Traveling from:

Starting location

Use my current location

Traveling to: (optional)

Destination

What is the purpose of the trip?

- Education
- Work
- Medical
- Other

Do any of the following apply?

- Age 60 or older
- Need escort to and from vehicle
- Need accommodation for wheelchair

How to use Find a Ride Florida

Find a Ride Florida is an online listing of transportation service providers in all of Florida's 67 counties.

Developed and maintained by UNIVERSITY OF FLORIDA

www.FindaRideFlorida.org

www.FindaRideFlorida.org

Step 1. Where do I want to go?

Begin by entering your starting location and any other details related to you or your trip.

Traveling from:

Starting location

Use my current location

Traveling to: (optional)

Destination

Step 2. What are my options?

Scroll through or print out the options listed in alphabetical order to find the provider that best fits your transportation needs.

Ride options that meet your needs

216 providers listed below may be a good fit for your trip from Gainesville

27 results shown in alphabetical order.

Narrow your search

*More search options allow you to narrow down your results.

Step 3. How do I contact a provider?

Call the phone number listed to contact the transportation provider of your choice or click the "More Info" button to view additional details about their services.

City of Gainesville Regional Transit System (RTS)

Main Line (352) 334-2850

Plan your trip with Google Transit.

Helping Florida's Aging Drivers Stay Safe and Mobile

The Florida Department of Transportation's Safe Mobility for Life Program and Coalition can help people of all ages remain safe and mobile for a lifetime. With more Florida residents over the age of 65 than there are residents under the age of 18,¹ it's more important than ever to help aging drivers learn the three keys to achieve safe mobility for life.

The three keys are:

- ★ Understand the impact aging has on driving
- ★ Be proactive about safe driving skills, and
- ★ Plan for a safe transition from driving

According to the 2016 Florida Strategic Highway Safety Plan, "As drivers age, their traffic risks increase. Aging impacts vision, memory, physical strength, reaction time and flexibility."

The U.S. Census Bureau estimated that in 2017, 20 percent of Florida's population was age 65 years and older.

The Bureau of Economic and Business Research (BEBR) at UF estimates that by 2030, 24 percent of Florida's population will be over the age of 65.

The Safe Mobility for Life Coalition's 2017 Aging Road User Strategic Safety Plan is being implemented to increase safety, access, and mobility for aging road users and eliminate fatalities and reduce serious injuries.

Tips for Similar Programs

- Remain flexible
- Build and maintain partnerships
 - Coalition members
 - Community partners and stakeholders
- Focus on safety, access, and mobility
- Develop and distribute a positive and consistent message

Always Remember...

- There is no specific age when normal physical, cognitive, or visual changes can affect safe driving skills.
- Resources and educational materials written and developed for an older adult can benefit everyone.
- You are not alone! Collaboration is key and resources are available to you.

Roadway Safety Foundation

- 501c-3 in Washington, DC dedicated to improving the safety of the nation's roads, bridges, roadsides, and operating conditions
- Chartered in 1995 by the American Highway Users Alliance
- Emphasis on injury prevention, the built environment, safe systems, and infrastructure solutions for vulnerable road users

What Is ChORUS?

- Partnership between
 - Federal Highway Administration (FHWA)
 - National Highway Traffic Safety Administration (NHTSA)
 - Roadway Safety Foundation (RSF)
 - Multiple IT and communications groups and Subject Matter Experts (SMEs)
- Mission is to serve as comprehensive, one-stop shop for research and resources pertaining to lifelong safe mobility

Highway Safety is 3-Legged Stool
